Work Experience

Crescent Bank – Carrollton, TX *(3+years)*

Software Engineer

Aug 2024 – Present

In this role, I design and support core banking applications while contributing to the automation of deployment and data workflows. I develop and maintain both front-end and back-end systems using SQL, JavaScript, Bash, PowerShell, .NET, and Bootstrap, I optimize SQL stored procedures to improve data accuracy and performance. I also build and manage API integrations using Dell Boomi, automate job scheduling with ActiveBatch, and work with Azure DevOps to support CI/CD practices. My focus is on creating reliable, scalable software solutions while ensuring environment stability and smooth releases in collaboration with engineers, business teams, and vendors such as shaw systems and e-collections.

System Analyst & Systems Engineer Support

Feb 2022 – Jul 2024

As System Analyst, I supported application and data teams by managing SQL environments, developing workflows in ActiveBatch, and maintaining integrations with Boomi. I worked on application deployments and updates to the company's main web platform, supporting both front-end and back-end development with C#, .NET, and JavaScript. My responsibilities included troubleshooting release issues, documenting processes, and improving automation to reduce errors in deployments. I partnered with engineers, operations, and vendors to deliver releases more efficiently, leveraging tools such as Azure DevOps, Postman, and SSMS.

Meyer Distributing – Arlington, TX *(3+years)*

Junior Web Developer

Sep 2019 – Feb 2022

I worked on the company's internal e-commerce platform, designing and maintaining responsive web layouts and implementing improvements with ASP.NET, C#, JavaScript, and Razor/MVC. I supported deployments by testing user interfaces and monitoring stability. I also contributed to side projects involving mobile applications and system integrations using Angular, Bootstrap, and Ionic, giving me exposure to multi-environment builds and releases.

Softwareland – Morelia, Mexico *(1years)*

Junior Full Stack Developer

Jan 2018 – Jan 2019

At Softwareland, I collaborated with engineering teams to develop web and mobile applications, using Java, JavaScript, C++, PHP, React, Node.js, and MySQL. I gained hands-on experience building user interfaces, managing APIs, and deploying applications across environments. I also worked on embedded systems using Raspberry Pi and Arduino, integrating hardware and software solutions. Additionally, I provided support to clients through training, system updates, and troubleshooting.

Core Skills

- **DevOps & CI/CD:** Azure DevOps, GitHub, ActiveBatch, Dell Boomi, API integrations
- **Automation & Scripting:** PowerShell, Python, SQL, JSON, Postman, REST APIs
- **Databases:** SQL Server (2016–2022), SSMS, RDS (AWS), data modeling, stored procedures.
- **Development:** C#, .NET, Java, JavaScript, Bootstrap, Angular, React, Node.js
- **Collaboration:** Agile sprints, cross-team coordination, vendor management, documentation.

Other Skills

- Front end development using:
  js, typescript, jquery, html, css, sass, angular, react native, asp.net. Node and mongo db.
- Manipulating data through: Sql, , json, mongoDb, postman and some REST api.
- Native Spanish and English language. Public speaking. Leadership and teamwork: able to generate enthusiasm and motivation. Experience and patience to train users in software systems. Technical skills for assembling and repairing electronic devices, including computer hardware maintenance. Microcontroller and sensor development and implementation. Windows, Linux and MacOS operating systems.
- User interface mockups in Sketch. Knowledge of Adobe Photoshop, Illustrator, and Microsoft Office.

Education

- **B.S. in Computer Science & Engineering** – Instituto Tecnológico de Morelia (2018).

Certificates

- E-Commerce Course, 40hrs - EOI España (online), 2016.
- Digital Marketing Course, 40hrs - Iab (online) 2016.
- Scrum Master (online) 2024

Objejective

I aim to add value to the team and company, contributing and growing my knowledge and skills to further personal and professional development.
